When you need Custom HVAC Registers, Vents or Grates to Match the Materials Used in Your Project. . .

WATERJETS UNLIMITED Can Produce the Impossible!

Would custom floor, ceiling and/or wall HVAC registers, vents or drain grates put the finishing touches on a project you are working on?

Whether indoors or outdoors, our cutting technology is able to size and configure plain or decorative designs and slots into stone, plastic, glass, metal or ceramic tiles with precision, accuracy and a satin-smooth finish that will allow for flawless installation. Metal backing plates can be cut to the same specs and be applied to the back of the grate to support any weight.

Because of the waterjet process, you are not restricted in your designs. Materials cut by our organization are not affected by heat or mechanical stress, and our process is environmentally friendly and does not release any emissions, pollutants or harmful waste.

From a single piece to a high-volume project, Waterjets Unlimited brings you the results you need with materials cut to your specifications.

Residential and Commercial applications including signage, flooring, glass, metal and granite materials are our specialty. Please visit our website at www.waterjetsunlimited.com or give us a call to learn more about Waterjets Unlimited. We look forward to serving you.

Sincerely,
Mark Grindel
President
